

Job Opportunity

Head of Product Management / Hamburg / Germany

OceanScore provides emissions- and sustainability-data, driving shipping's transformation to net-zero. Combining engineering and datascience, our platform offers unique insights into more than 100.000 vessels. We know that shipping is the most environmentally efficient way of transport, but shipping's emissions need to be addressed. We provide the required transparency and provide data as the necessary basis cross sector collaboration.

OceanScore is a start-up based in Hamburg/Germany and on Madeira/Portugal, with reputable partners like Mediterranean Shipping Company (MSC). Our customers are top-names in shipping as well as banks, P&I clubs, freight forwarders, cargo owners and ports.

We are embarking on an amazing journey: expanding our product offering, enhancing the depth of data-solutions and driving customer success. This journey needs you:

Head of Product Management

As head of product management, you are responsible for OceanScore's product strategy and our product roadmap, balancing the need to stay focused with the need to build superior solutions for the segments we serve and the respective use cases. This responsibility includes the technology choices for our solutions as well as for data management and storage.

You will make sure that the many great ideas coming from customers, partners, our own team,... find their way into the solutions we offer. You will manage the process from gathering feedback and input, distilling opportunities to create superior value for our customers. Based on this, you will build, test and iterate prototypes and translate the resulting learnings into well defined development projects.

You will prioritize our product backlog, participate in regular scrum-, planning- and review meetings, leading our development team – based in Gdansk / Poland – to deliver on time, spec and budget.

You will support our business development managers as well as customers with outstanding solutions and domain expertise.

Being databased, our solutions require massive data streams from different sources. You are responsible for evaluating these data streams, identifying better options to what we currently use and new streams for new solutions offering superior customer value.

Customers come first in OceanScore. You will spend significant time with customers to gain deep insights into their needs. You will work with our analytics team on Madeira / Portugal and lead the development activities in Gdansk / Poland. Given the strategic relevance of this role, you will report directly to one of OceanScores two MDs.

You are:

- building on several years in a comparable role, ideally in shipping. This includes customer focused product management, back- and frontend development, work with data and data analytics

- knowledgeable of at least basics ship management, hydrodynamics and mechanical engineering or eager to learn about them
- able to balance strategic perspectives and a structured approach with the need to get “your own hands dirty” in day to day work and regular and rapid adjustment of priorities
- combining strong analytics with the ability to make sound strategic judgements, encompassing financial perspectives
- enjoying to work with customers directly, exploring their needs and building trustbased relationships
- comfortable with the responsibility coming with such a role
- a teamplayer who sees challenges not problems, is eager to learn and grow personally

Location: Hamburg / Germany

What do we offer:

- We are a startup, combined with decades of diverse experiences in our team: A great place to grow, learn and have fun.
- Young and vibrant as we are, you have plenty of opportunity to have real impact, to decide on our way ahead. And on shipping’s path to net-zero
- With hubs on Madeira / Portugal and in Hamburg / Germany, we are happy for you to work from either these two great cities from time to time as you like
- Life has so much to offer: We grant 32 days off per year so that you can make more of it!
- We want you in our team. So we want to work with you, learn from you, create with you. In our offices. But every day? No, not necessarily. Let’s discuss what makes most sense for you and us.
- Participation in OceanScore’s Virtual Share Option Program
